

Short CV

Dr. Andrej Perdih is a senior research associate at the Theory Department of the National Institute of Chemistry in Ljubljana, Slovenia and an associate professor at the Faculty of Pharmacy, University of Ljubljana. In 2009, he completed his PhD studies in Medicinal Chemistry at the University of Ljubljana. Following that, he undertook two postdoctoral stays at Freie Universität Berlin, Germany, and the University of Michigan, USA. His primary research interests are computational biochemistry and computer-aided molecular design. He is actively engaged in collaborations with multiple research teams, both domestically in Slovenia and internationally. He has successfully led or participated in several research and bilateral projects, which resulted in approximately 70 published scientific articles.
